Assessment Rubric — Water Safety Unit

📐 Assessment Tasks Overview

This rubric applies to the two summative assessment tasks in the unit:

- **Task 1 (40%):** Student Workbook — completed across all 5 lessons, collected end of unit
- **Task 2 (60%):** Water Safety Communication Campaign — social media post, letter, or fact sheet

Note: Adjust weighting to suit your school's reporting requirements. Formative data (exit tickets, role-play observations) informs teacher feedback but is not formally graded.

E — Emerging | D — Developing | C — Consolidating | B — Building | A — Extending

Criteria	E — Emerging	D — Developing	C — Consolidating	B — Buildi
Hazard Identification (VC2HP8P10)	Names one or two hazards with limited accuracy; relies on general or obvious examples only	Names several hazards; some accurate; minimal explanation of why each is dangerous	Accurately identifies key hazards in given environments; provides brief explanation for most	Accurately identifies multiple hazards across different environmer explains ea clearly with reference t context

Criteria	E — Emerging	D — Developing	C — Consolidating	B — Buildi
Water Safety Knowledge (VC2HP8P10)	Demonstrates minimal knowledge; responses are vague or inaccurate; unable to describe beach flags or DRS ABCD correctly	Demonstrates basic knowledge of some safety rules; some errors in DRS ABCD or flag identification	Demonstrates sound knowledge of beach flags, DRS ABCD, and SwimSafe rules; mostly accurate	Demonstra thorough knowledge; accurately applies saf knowledge different environmer (beach, rive pool)
Application to Scenarios (VC2HP8P08, VC2HP8P10)	Responses are superficial or incorrect; does not apply safety knowledge appropriately to scenarios	Applies some correct steps to scenarios; significant gaps in logical reasoning; some unsafe decisions remain unjustified	Applies correct safety procedures to most scenarios; reasoning is generally sound; some gaps	Consistentl applies correct safe procedures justifies decisions clearly; identifies multiple risk factors per scenario
Decision-Making & Peer Pressure (VC2HP8P08)	Does not identify peer pressure as a factor; unable to propose a strategy for resisting unsafe decisions	Identifies peer pressure as a factor; proposes a basic strategy with limited detail or realistic application	Explains how peer pressure influences water safety decisions; describes a realistic strategy for managing peer pressure	Analyses peer pressu in context; proposes specific, realistic strategies with clear justification connects to personal experience

Criteria	E — Emerging	D — Developing	C — Consolidating	B — Buildi
Emergency Response (VC2HP8P10)	Unable to describe DRS ABCD correctly; does not understand throw rescue principle	Describes some DRS ABCD steps; errors or omissions in sequence; partial understanding of rescue safety	Describes DRS ABCD in correct order with reasonable accuracy; understands "throw, don't go" principle	Accurately describes a applies DR ABCD in scenario contexts; explains throw rescu with specifi understand when to ca 000
Communication Campaign Task (VC2HP8P10)	Incomplete or very brief; message is unclear; audience not considered; no accurate data used	Attempts an appropriate format; message is mostly clear; some relevant safety information; limited use of data	Clear message appropriate for chosen audience; includes at least one accurate statistic; communicates effectively	Compelling well-structured message clearly targeting chosen audience; accurate statistics us effectively; includes a clear call to action
Personal Action Plan (VC2HP8P10)	Generic or incomplete plan; "I will be careful" type responses; lacks specificity	Some personal commitment evident; at least one specific safety rule identified; limited connection to own life	Specific, realistic commitments to personal water safety; shows connection between knowledge and own behaviour	Thoughtful, personalise action plan multiple specific commitmer shows genuine reflection o own habits and risk contexts

📝 Formative Assessment Checklist (Lessons 1–4)

Record observations during class. These are not formally graded but inform feedback and identify students who need support.

Observable Behaviour	Lesson	Note if: concern / developing / confident
Can identify 5+ water hazards independently	L1	*Teacher observation*
Correctly identifies all 6 beach flags	L2	*Workbook 2.1*
Describes rip current escape correctly	L2	*Workbook 2.2*
Recalls DRS ABCD without prompt	L3	*Opening activity*
Physically demonstrates throw rescue	L3	*Practical observation*
Articulates peer pressure strategy convincingly	L4	*Discussion / Q 4.1a*
Can explain cold water shock effects	L4	*Workbook 5.1*

Curriculum Alignment — Victorian Curriculum 2.0

📋 HPE Content Descriptions — Year 7–8

Code	Content Description	How This Unit Addresses It	Assessment Task
VC2HP8P10	Plan and implement strategies, using health resources, to enhance their own and others' health, safety, relationships and wellbeing	Students investigate and select water safety strategies appropriate for Victorian environments (beach, river, pool, inland waterways)	Workbook Sections 1–5; Action Plan
VC2HP8P10	Plan and implement strategies, using health resources, to enhance their own and others' health, safety, relationships and wellbeing	Students develop a personal water safety action plan AND create a community-facing communication campaign	Workbook Section 6; Campaign Task
VC2HP8P09	Investigate how media and influential people in the community impact attitudes, beliefs, decisions and behaviours in relation to health, safety, relationships and wellbeing	Students analyse and evaluate LSV drowning data, identify reliable sources, and use evidence to justify safety claims	Workbook Sections 1, 5; Research Questions
VC2HP8P08	Refine protective behaviours and evaluate community resources to seek help for themselves and others (including basic first aid and CPR)	Students analyse peer pressure as a barrier to safe decisions near water and propose strategies to overcome it	Workbook Section 4; Scenario Cards D1, D2
VC2HP8M01	Refine and perform specialised movement skills in aquatic environments	Students apply survival swimming theory (floating, rip current response, throw rescue) — practical application if pool access available	Practical observation (L3); Workbook Section 3

🎯 Focus Areas — Year 7–8

Focus Area	Abbreviation	Unit Links
Safety	`S`	Core focus — water hazards, emergency response, rescue principles, flag systems
Lifelong Physical Activities	`LPA`	Swimming as a lifelong health-enhancing and social activity
Fundamental Movement Skills	`FMS`	Floating, aquatic movement, survival swimming (practical component)

📈 Achievement Standard Links — Level 7–8

By the end of Level 8, students are expected to:

- Investigate strategies that enhance their own and others' health, safety and wellbeing
- **Justify actions** that promote their own and others' health, safety and wellbeing at home, school and in the community
- Gather and **analyse health information** to make informed decisions
- Explain personal and social skills required to maintain respectful relationships
- Demonstrate control and accuracy when performing specialised movement skills

📝 How to Use This Gradebook

Click on any yellow cell to edit. Enter A/B/C/D/E grades for each criterion, and the overall grade column. This is designed to be printed or screenshotted. For a full digital gradebook, copy data to Excel or your school's reporting platform.

Class: 7A HPE **Teacher:** **Term:** **Year:** 2026

Student Name	Task 1 — Workbook (40%)				Task 2 — C
Hazard ID VC2HP8P10	**WS Knowledge** VC2HP8P10	**Scenarios** VC2HP8P08	**Emergency** VC2HP8P10	**Communication** VC2HP8P10	**Data Use** VC2HP8P09

Student Name	Task 1 — Workbook (40%)				Task 2 — C

📊 Grade Conversion Guide

A — Extending: Student demonstrates outstanding depth of understanding, analysis, and application beyond expected level

B — Building: Student demonstrates strong understanding and applies knowledge confidently across most tasks

C — Consolidating: Student demonstrates sound, accurate understanding appropriate to the year level standard

D — Developing: Student demonstrates partial understanding; some key knowledge or skills not yet secure

© 2026 Emilie Harrison · CC BY 4.0 · emilie-harrison.github.io/swim-water-safety · Third-party content excluded

E — Emerging: Student demonstrates limited understanding; requires significant additional support

Report Comment Generator

💬 Generate Report Comments

Select the student's grade level for each dimension, then click "Generate Comment" to produce a curriculum-aligned report comment you can copy and customise.

⚙️ Comment Settings

Student name: e.g. Alex

Pronoun: They / Their

Overall grade: C — Consolidating

Strength area: hazard identification and risk analysis

Development area: justifying reasoning in scenarios

✨ Generate Comment

📝 Pre-Written Report Comments by Grade

Copy and customise these comments. Replace [NAME] with the student's name.

A — Extending

[NAME] demonstrated an outstanding depth of understanding across all areas of the Water Safety unit. [He/She/They] consistently applied accurate water safety knowledge — including beach flag identification, rip current survival techniques, and DRS ABCD emergency response — to complex scenarios, justifying decisions with precision and insight. The communication campaign task was exceptional, demonstrating professional-quality audience awareness and evidence-based persuasion. [NAME] showed genuine critical thinking about the social and environmental factors driving Victorian drowning statistics, and produced a personal action plan that reflects sophisticated, realistic self-awareness. A pleasure to work with.

B — Building

© 2026 Emilie Harrison · CC BY 4.0 · emilie-harrison.github.io/swim-water-safety · Third-party content excluded

[NAME] performed strongly throughout the Water Safety unit, demonstrating thorough knowledge of water safety principles including beach flags, rip current response, and emergency procedures. [He/She/They] applied this knowledge confidently to scenario-based tasks, generally justifying decisions clearly and identifying multiple risk factors. The communication campaign showed a clear, well-targeted message with effective use of Victorian drowning statistics. To extend further, [NAME] should continue to develop the depth of reasoning when applying safety strategies to unfamiliar or complex scenarios.

C — Consolidating

[NAME] demonstrated sound knowledge of water safety principles at the expected standard for Year 7–8. [He/She/They] accurately identified key beach flags, described the DRS ABCD emergency action plan, and applied appropriate safety strategies to most scenarios in the workbook. The communication campaign was clear and audience-appropriate, including relevant safety information. To progress further, [NAME] should focus on justifying reasoning more thoroughly when applying safety knowledge to complex or unfamiliar scenarios, and extending use of data to support responses.

D — Developing

[NAME] is developing their understanding of water safety principles. [He/She/They] demonstrated some knowledge of beach flags and basic emergency response steps, though some inaccuracies and gaps remain, particularly in applying DRS ABCD consistently and justifying decisions in scenario tasks. The communication task showed an attempt at the required format with some relevant safety information included. Next steps involve consolidating knowledge of key safety rules and practising applying this knowledge to different aquatic environments with greater explanation of reasoning.

E — Emerging

[NAME] is at an emerging stage of understanding in this unit. With support, [he/she/they] identified some basic water hazards and engaged with class discussions on water safety. Key areas to develop include consolidating knowledge of the beach flag system, DRS ABCD emergency response sequence, and applying safety strategies to real-world scenarios. Individual support has been provided and [NAME] is encouraged to review the unit workbook materials and the Life Saving Victoria resources at lsv.com.au to build confidence in this important area.
