ASSESSMENT RUBRIC · YEAR 9–10 ADVANCED WATER SAFETY

Teacher & Student Copy

Advanced Water Safety — Assessment Rubric

Health & Physical Education · Year 9–10 · Victorian Curriculum F–10 Version 2.0

STUDENT NAME	CLASS	TEACHER	ASSESSMENT OPTION (CIRCLE)	DUE DATE
			A — Policy Brief B — Campaign C — School Audit	

How to use this rubric

Read each criterion row carefully. Before submitting your work, complete the *Student Self-Assessment* column honestly — circle the grade descriptor that best matches your work. Your teacher will independently complete their assessment. Differences between your self-assessment and teacher assessment are a great starting point for feedback conversations.

What the grades mean

A — Extending:

Sophisticated, evidence-rich, insightful analysis.

B — Building:

Accurate, well-supported, clearly argued.

C — Consolidating:

Sound understanding, reasonable evidence.

D — Developing:

Partial understanding, limited evidence.

E — Emerging:

Beginning to engage with the concepts.

Grade scale: E — Emerging | D — Developing | C — Consolidating | B — Building | A — Extending

Criterion & Curriculum Code	E — Emerging	D — Developing	C — Consolidating	B — Building	A — Extending	Student Self-Assessment Complete before submitting
1. Data Analysis & Calculation VC2HP10P08	Cannot perform basic drowning rate calculations; misinterprets or ignores data.	Attempts calculations with errors; provides a simple description of data without interpretation.	Correctly calculates at least one rate; provides a reasonable, if brief, interpretation linking figures to context.	Accurate calculations with working shown; interprets significance and compares across contexts (e.g. Victoria vs national vs global); identifies key trends.	Sophisticated calculations; nuanced interpretation; identifies implications and limitations of the data; draws connections to other unit content.	*I think I am at:* ○ *E — Emerging* ○ *D — Developing* ○ *C — Consolidating* ○ *B — Building* ○ *A — Extending*
2. Physiological Knowledge VC2HP10P08 · VC2HP10M01	Cannot describe drowning physiology; vocabulary absent or significantly incorrect.	Names some physiological processes but cannot explain the mechanisms behind them.	Describes the drowning sequence in the correct order; uses most of the required vocabulary terms correctly.	Explains mechanisms precisely (not just names them); connects physiology to the CPR rationale and survival outcomes in a logical chain.	Sophisticated, accurate physiological analysis; all specified terms used correctly in context; explains clinical implications including the 4-minute window and secondary drowning.	*I think I am at:* ○ *E — Emerging* ○ *D — Developing* ○ *C — Consolidating* ○ *B — Building* ○ *A — Extending*
3. Social Determinants Analysis VC2HP10P02	Identifies individuals as solely responsible; no systemic analysis present; relies on stereotypes.	Acknowledges that social factors exist; limited or superficial analysis of how they work.	Identifies key social determinants (e.g. gender norms, CALD background, SES); explains how they increase risk with reference to Victorian data.	Analyses multiple determinants with specific evidence; distinguishes structural from individual causes; proposes targeted strategies linked to specific mechanisms.	Sophisticated structural analysis; clearly distinguishes individual vs systemic causes; proposes evidence-based, equitable interventions; acknowledges complexity and intersectionality.	*I think I am at:* ○ *E — Emerging* ○ *D — Developing* ○ *C — Consolidating* ○ *B — Building* ○ *A — Extending*

Criterion & Curriculum Code	E — Emerging	D — Developing	C — Consolidating	B — Building	A — Extending	Student Self-Assessment Complete before submitting
4. Prevention Strategy Evaluation VC2HP10P08 · VC2HP10P09	Cannot distinguish stronger from weaker prevention evidence; describes strategies without evaluating them.	Names prevention strategies; evaluates them superficially without using evidence or criteria.	Evaluates at least two strategies with reference to evidence; identifies at least one limitation for each; shows awareness of trade-offs.	Comparative evaluation using an evidence hierarchy; explicitly justifies resource allocation decisions; references specific studies or data sources.	Critical, nuanced evaluation; acknowledges trade-offs and context-dependence; sophisticated prioritisation with specific, well-justified reasoning and primary source citations.	*I think I am at:* ○ *E — Emerging* ○ *D — Developing* ○ *C — Consolidating* ○ *B — Building* ○ *A — Extending*
5. International Comparison VC2HP10P09	No evidence of research; cannot identify or describe any international approaches.	Names one international organisation; provides a superficial, mostly descriptive account.	Compares at least two international approaches against Victorian practice; identifies at least one substantive difference.	Identifies substantive differences and similarities; evaluates the relevance of international approaches to the Victorian context with specific reasoning.	Critical, evidence-based comparison drawing on primary sources; argues specifically for or against adoption of international elements in Victoria; acknowledges contextual factors.	*I think I am at:* ○ *E — Emerging* ○ *D — Developing* ○ *C — Consolidating* ○ *B — Building* ○ *A — Extending*
6. Communication Product VC2HP10P08	Incomplete; no clear audience, no evidence, no call to action or recommendation.	Basic message present; audience vague; one loosely cited fact; call to action generic.	Clear message; appropriate audience; at least one data-backed claim with source URL; specific call to action or recommendation.	Compelling product; evidence-based claims throughout; language clearly tailored to the named audience; measurable and realistic outcomes proposed.	Sophisticated, persuasive, evidence-rich product demonstrating advanced health literacy; addresses specific barriers for the target group; measurable outcomes; primary source citations throughout.	*I think I am at:* ○ *E — Emerging* ○ *D — Developing* ○ *C — Consolidating* ○ *B — Building* ○ *A — Extending*

Criterion & Curriculum Code	E — Emerging	D — Developing	C — Consolidating	B — Building	A — Extending	Student Self-Assessment Complete before submitting
6. Diving & Spinal Injury Analysis VC2HP10P02 · VC2HP10P08	Cannot identify the mechanism of diving-related spinal injury; confuses swimming ability with injury prevention.	Identifies that diving can cause spinal injury; cites one statistic with a source; limited explanation of why the injury occurs.	Explains the cervical spine mechanism accurately; cites at least two AIHW/RLSSA statistics; provides a reasonable case study analysis identifying one common factor.	Accurate physiological explanation; two or more statistics cited with sources; case study analysis identifies common factors across all three incidents and explains the specific mechanism — not just the behaviour — in each.	Sophisticated analysis; structural explanation for the 95% male statistic using social determinants; distinguishes individual from structural causes; explains why inland waterway diving risk compounds with remote rescue delay and alcohol/group dynamics; evaluates the "Feet First" prevention message against evidence; proposes a complementary strategy for a named high-risk group with a SMART metric. Accurately deploys terms including quadriplegia, cervical spine, and false confidence.	*I think I am at:* ○ *E — Emerging* ○ *D — Developing* ○ *C — Consolidating* ○ *B — Building* ○ *A — Extending*

STUDENT SELF-ASSESSED OVERALL GRADE
