REFERENCE DOCUMENT · SEPTEMBER 2026

Copyright, Ownership & Licensing

What you may do with these resources, who owns what, and where the licence stops. Written for teachers, faculty leaders and anyone republishing or adapting the suite.

CC BY 4.0 | Free to adapt | Commercial use permitted | Attribution required

The short version

You can use this. Freely. Copy it, print it, edit it, put it in your own unit plan, translate it, hand it to a colleague in another state, use it in paid professional learning. You need to do one thing: say where it came from.

What you cannot do is re-license the material that belongs to other organisations. That distinction is the whole point of this document.

1. Ownership

The Swim & Water Safety Teaching Hub — lesson plans, workbooks, posters, scenario cards, rubrics, slide decks, quizzes and this website — was created by **Emilie Harrison**, who holds copyright in the original material.

The suite was developed as an independent project undertaken through a Life Saving Victoria leadership program. It was not produced in the course of employment duties for any school or employer.

Copyright in original literary and artistic works subsists automatically under the *Copyright Act 1968* (Cth). No registration is required in Australia.

2. Licence

Creative Commons Attribution 4.0 International (CC BY 4.0)

Adopted September 2026. Under this licence you are free to:

- **Share** — copy and redistribute the material in any medium or format
- **Adapt** — remix, transform and build upon it, for any purpose, including commercially

These freedoms cannot be revoked as long as you follow the licence terms:

- **Attribution** — give appropriate credit, provide a link to the licence, and indicate if changes were made
- **No additional restrictions** — you may not apply legal terms or technological measures that legally restrict others from doing anything the licence permits

Suggested attribution

```
“Swim & Water Safety Teaching Hub” by Emilie Harrison, licensed CC BY 4.0.
Source: emilie-harrison.github.io/swim-water-safety
```

If you have adapted the material, say so: “Adapted from …”. That protects you as much as the author — it makes clear which judgements are yours.

Licence history — why this changed

The repository previously carried a **GNU General Public License v3**. GPL v3 is a software copyleft licence. Its core mechanics — source code distribution, object code, the definition of "the Program" — have no sensible application to lesson plans and PDFs, and its copyleft provisions would have required anyone incorporating a single worksheet into their own unit to release that whole unit under the GPL. Almost no teacher would do that, so in practice the old licence discouraged exactly the reuse it appeared to invite.

CC BY 4.0 was chosen over the NonCommercial and ShareAlike variants deliberately. NC would block Life Saving Victoria, AUSTSWIM or a swim school from using this material in paid professional learning — a legitimate and desirable distribution channel. SA would reintroduce the GPL problem. CC BY also matches ACARA, which licenses Australian Curriculum material under CC BY 4.0, so curriculum content and this suite can be blended without a licence conflict.

CC licences are irrevocable. Material released under CC BY 4.0 stays available under those terms for anyone who received it, even if the licence on this site changes later.

3. What the licence does not cover

Third-party material is excluded

This suite cites, quotes, links and builds on material owned by other organisations. **None of it is sublicensed under CC BY 4.0.** A licence can only be granted over what the licensor owns.

If you republish an adapted version of this suite, you must carry this limitation forward. Applying a blanket CC BY notice to a package containing third-party content misrepresents what you are entitled to grant.

Organisation	Material used in this suite	Their copyright position	What you may do
Life Saving Victoria (LSV) lsv.com.au	SwimSafe rules; Victorian Drowning Report 2024–25 data and figures; School Swimming and Water Safety Toolkit; Swim City; Victorian Water Safety Certificate; Program Finder	© Life Saving Victoria Limited. All rights reserved.	Cite and link. Do not reproduce the Toolkit resources or report graphics in your own published materials without permission. Data may be quoted with attribution.
Royal Life Saving Society – Australia royallifesaving.com.au	National Drowning Report 2026; Swim and Survive; Bronze e-Lifesaving	© Royal Life Saving Society – Australia. Program names are trade marks.	Cite and link. Program names must not be used to describe your own activities.
Surf Life Saving Australia (SLSA) sls.com.au · beachsafe.org.au	BeachSafe app and website; Summer Coastal Drowning Report 2025/26; red and yellow flag device; Beach Passport	© Surf Life Saving Australia. Publications are expressly copyright — reproduction requires prior permission.	Link to BeachSafe; do not embed or mirror it. Report content requires written permission to reproduce.
Victorian Curriculum and Assessment Authority (VCAA) f10.vcaa.vic.edu.au	Victorian Curriculum F–10 Version 2.0 content descriptions, elaborations and achievement standards; VC2HP and VC2E codes	© Victorian Curriculum and Assessment Authority.	Reproduced for educational purposes with attribution. Check the VCAA copyright statement before commercial reuse.
ACARA australiancurriculum.edu.au	Australian Curriculum Version 9.0 content descriptions; AC9HP codes	© ACARA 2010–present, licensed CC BY 4.0.	Freely reusable with attribution. The most permissive third-party source in this suite.

Organisation	Material used in this suite	Their copyright position	What you may do
AIATSIS aiatsis.gov.au	Map of Indigenous Australia	© AIATSIS. The Map is licensed for specific uses and is not freely reproducible.	Link only. Do not reproduce the Map in school-published materials, printed posters or slide decks without checking AIATSIS licensing.
Australian Resuscitation Council (ARC) resus.org.au	Resuscitation guidelines underpinning all CPR content — compression rate, depth, ratio, bystander CPR rationale	© Australian Resuscitation Council.	Cite as the clinical source. Do not present ARC guidance as your own or alter the clinical parameters.
World Health Organization who.int	Global drowning fact sheet and statistics used in Year 9–10 international comparison	© WHO, generally CC BY-NC-SA 3.0 IGO.	Note the non-commercial and share-alike terms — these are more restrictive than this suite's own licence.
World Bank data.worldbank.org	Open Data country income classifications (Year 9–10 Extension Q1.3)	© World Bank, licensed CC BY 4.0.	Freely reusable with attribution.
Victorian Department of Education education.vic.gov.au	Policy and Advisory Library; Swimming Instruction and Water Safety Education policy; Respectful Relationships materials	© State of Victoria (Department of Education).	Link to policy rather than reproducing it — policy text changes and a stale copy is a compliance risk.
Consumer Affairs Victoria consumer.vic.gov.au	Pool and spa fencing legislation referenced in Year 9–10 Extension Q3.2	© State of Victoria.	Link to the current legislation page; requirements change.

Organisation	Material used in this suite	Their copyright position	What you may do
Google Fonts (Syne, Inter, JetBrains Mono, DM Mono, Playfair Display) fonts.google.com	Typography across all HTML pages and PDFs	SIL Open Font License 1.1.	Free to use, embed and redistribute, including commercially. No attribution required in the rendered output.

4. Educational use of third-party material

Two provisions of the *Copyright Act 1968* (Cth) are relevant to how this suite uses other organisations' material, and to how you use it in class.

Fair dealing for research or study

Sections 40 and 103C permit dealing with copyright material for research or study, subject to a fairness test that considers the purpose, the nature of the work, the amount taken and the effect on the market for the original. This supports quoting statistics and citing guidelines. It does not support reproducing a substantial part of someone else's resource and distributing it as your own.

The statutory educational licence

Part VB (now sections 113P and following) allows educational institutions to copy and communicate material for educational purposes under a statutory licence administered by the Copyright Agency. Most Australian schools are covered. This is what lets a teacher photocopy a chapter for a class — it is not a general permission to publish material on a public website or in a commercial product.

This document is general information, not legal advice. For anything involving commercial publication, translation for distribution, or reproduction of another organisation's material at scale, get advice from a copyright lawyer or the Copyright Agency.

Attribution required inside the files, not just on the site

Life Saving Victoria has confirmed it makes no intellectual property claim over this suite. Its only requirement is that **LSV data carries a copyright attribution within the files that use it** — not merely on the website or in this document.

Every resource in the suite that quotes drowning statistics now carries the formal citation in its own footer, and that citation is reproduced in the PDF and PowerPoint versions so it travels with a downloaded or emailed file. If you adapt any of these resources, **retain those citations.** Stripping them breaks the condition on which the data is used.

5. Data and statistics

Facts and statistics are not themselves protected by copyright — the expression of them is. You may state that Victoria recorded 52 fatal drownings in 2024–25. You may not reproduce Life Saving Victoria's infographics, charts or report layout.

Statistics throughout this suite are current to:

- Life Saving Victoria, *Victorian Drowning Report 2024–25* (2025)
- Royal Life Saving Australia, *National Drowning Report 2026*
- Surf Life Saving Australia, *Summer Coastal Drowning Report 2025/26* (2026)

Always cite the report and year. Drowning figures change annually and an uncited number rapidly becomes an unverifiable one.

6. AI-assisted development

This suite was developed with AI assistance for research, drafting, formatting and code generation. Educational judgement, curriculum alignment decisions, pedagogical sequencing and final content review are the author's.

The position on copyright in AI-assisted work is unsettled in Australia; the prevailing view is that material requires human authorship to attract copyright protection. The substantive intellectual contribution here — unit structure, curriculum mapping, task design, differentiation decisions — is human. This is disclosed rather than concealed, because teachers evaluating a resource are entitled to know how it was made.

7. If you find an error or a copyright problem

If you believe material in this suite infringes your copyright, or you spot a factual error, contact swimwater.safety@gmail.com. Errors are corrected and republished; anything genuinely infringing is removed.

Every attempt has been made to identify and correctly attribute third-party material. Where that has not been possible, corrections are welcomed.
